HIGHLIGHTS

- Stainless steel horizontal evaporating drum: for a life-long working endurance.
- Floor standing compatible: delivers ice straight into carts, trolleys or ice boxes (compact version only).
- Plug-and-work technology: starts off and constantly produces ice thanks to a no-cycle harvesting system (compact version only).
- All water in / all ice out concept (no cycles, zero water wastage): limits to almost zero excess energy, water and time wastage.
- Compact configuration: includes evaporator, compressor and condensing units.
- Split configuration: evaporator supplied only. For connections to remote condensing units, either dedicated or centralized.
- Head only ice maker: requires a separate ice storage bin.
- EcoX models: using natural Carbon Dioxide R744 refrigerant.

Scale ice

The coldest one

MAR SERIES

Made by irregular fragments of ice with a variable thickness adjustable from 1 to 2 mm, it's very dry and it's the coldest form of ice.

Ideal for industrial processes, for fish and sea-food display and perishable goods transportation, as well as to optimize dough temperature.

Versatile, molding to any shape, melts at a slow and regular rate to keep food at maximum freshness.

Scale Ice
Residual water content 2%
