

MF SERIES

High production ice machines making Flake ice.
Delivering pure freshness.

HIGHLIGHTS

- Agion: the technology that makes products cleaner and longer lasting with built-in protection working 24/7 to resist the growth of microbes and the development of unpleasant odors.
- Electronic control: ambient and water temperatures may change throughout the years but your ice machine will stay the same (MF86/ MF88 electro-mechanical board).
- Plug-and-work technology: starts off and constantly produces ice thanks to a no-cycle harvesting system.
- Water in / ice out concept (no cycles, zero water wastage): limits to almost zero excess energy, water and time wastage.
- Head only ice maker: requires a separate ice storage bin.
- EcoX models: using natural refrigerants only, Hydrocarbons R290 and Carbon Dioxide R744.

Flake ice

The talented one

MF SERIES

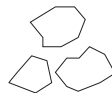

Ice in its most natural shape.
it is made at a temperature just below 0°C.
Highly versatile and suitable for multiple applications:
fish display counters, buffet display,
frozen drinks preparation as well as
fast chilling of wine & champagne buckets.
It comes in two different variations:
Flake with 25% residual water content and
Superflake with 15% residual water content.

Flake Ice

Residual water content 25%

Superflake Ice

Residual water content 15%
